

DreamTeam Roadshow 2010: Solutions for Current Challenges in Aquaculture

Due to the amazing response for the DreamTeam Roadshow 2009, another DreamTeam Roadshow was organized in June 2010, this time with the theme "Solutions for the Current Challenges in Aquaculture/ Shrimp Culture".

DreamTeam Roadshow 2010 was held in 2 locations in Sabah. The first was held in the Heritage Hotel, Tawau on the 22nd of June and the other in Wisma Pertanian, Kota Kinabalu on the 24th of June. Both venues were well received. Farmers, government officers and in fact anyone who was interested in aquaculture were encouraged to attend.

There were three speakers invited for the talks. The first speaker was Dr Pornlerd Chanratchakool from Novozymes Biologicals who spoke on the proper feed management and the use of beneficial bacteria to maintain good water conditions for optimal production. The second speaker was Mr Karunanithi Muthusamy from Syndel Asia Sdn Bhd who presented a successful trial using the DreamTeam Concept whilst managing a tiger prawn farm. Last but not least, Ms Liew Chiow Yen spoke on the proper management concepts for marine fin fish cage culture which is becoming a big industry in Tawau. However in Kota Kinabalu, Ms Liew spoke on the importance of using registered and approved products before and during prawn culture to enhance the capability of Malaysian farms to play a more significant role in world food production.

For further information on the talks or on the location of the next DreamTeam Roadshow, please do contact us at info@syndelasia.com or visit our website.
