

Questionnaire re: Ovaprim

The information below will likely go beyond the space on this page. Please provide as much information as possible by attaching as many pages as required.

1. What is the concern:
2. REFERENCE:
3. Location:
4. Lot #
5. Ovaprim Storage conditions:

6. Species:
7. Stock:
8. Size:
9. Water temperature:
10. Oxygen levels:
11. pH:
12. Freshwater/Saltwater:
13. Was there any environmental manipulation:
14. Were the fish stressed prior to spawning:

15. Target dose:
16. Number of fish to be spawned:
17. Have spawning products (including Ovaprim) been used on this stock previously:
18. Why was Ovaprim used – objectives of spawning and treatment
19. Have you attempted to achieve those objectives before – using which product/technique, - have you used Ovaprim for this application previously
20. Was this the only group of fish treated with Ovaprim? Results from other groups?
21. How were fish selected for this treatment
22. Were there any changes in rearing or handling? Any abnormal events or conditions?
23. Were any other comparable fish or groups spawned without Ovaprim treatment?
24. Were the fish examined after spawning – any abnormal findings? Eggs and progeny examined – any abnormal findings?
25. Method of application:
26. Details of dose calculations:
27. Spawning results (current and historical) – time to spawn, # of eggs, fertility, etc. – as much data as possible:

28. This information is provided by:
